TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Lua
- **Technologies & Frameworks :** React, Next.js, Node.js, Express.js, Tailwind CSS, Motion, Zustand, Prisma, HTML5, CSS3, PostgreSQL, MongoDB, Laravel, Supabase, Docker, Redis, AWS S3, Linux, Git, Github

EXPERIENCE

EastLancers — Full Stack Developer

Full-time | Remote | Jan 2024 - April 2026

Tech Stack: React, Next.js, Laravel, Tailwind CSS, Node.js, MongoDB, PostgreSQL, Prisma, Zustand

- Delivered full-stack web applications for clients across multiple industries, building marketplaces, dashboards, and business platforms using Next.js, React, Node.js, Express.js, MongoDB, and Prisma.
- Built clean, responsive UI components with React, Motion and Tailwind CSS, focusing on reusability and performance and enhanced user experience by adding smooth transitions, animations, and interactive states.
- Developed scalable backend services, REST APIs, authentication systems, advanced filtering engines.

PROJECTS

Batchmark

Building a privacy-first, browser-based image platform for watermarking, converting, and renaming images locally without server uploads. Developing a high-performance batch engine that applies customized watermarks consistently across hundreds of images in one operation.

Technologies: Next.js, Typescript, Tailwind CSS, Motion, PostgreSQL, Redis, Prisma

KDE Connect

Built an extension for Vicinae that provides quick and effortless device integration and sharing with your paired mobile devices. Send files, share clipboard contents, ring your phone, compose SMS messages, and transfer text across one or multiple devices— directly from your launcher.

Niri Monitors

Built an extension for Vicinae to manage your connected displays without leaving the launcher. Turn monitors on or off, switch resolutions, adjust scale, and rotate a display — all from a single command, built for the Niri wayland compositor.

TmpBox

Built a lightweight, browser-based file sharing platform that enables instant file transfers without requiring user accounts, featuring custom expiry dates and secure cloud storage.

Technologies: Next.js, MongoDB, Typescript, Shadcn UI, Tailwind CSS, AWS S3

Supabase MCP

Developed an MCP server that allows AI assistants to securely interact with Supabase databases, supporting CRUD operations, schema inspection, and database management through natural language.

Technologies: Next.js, Typescript, Radix UI, Tailwind CSS, Supabase, Model Context Protocol, Mcp Adapter

Whisprly

Built a real-time messaging platform featuring instant messaging, media sharing, friend management, and responsive chat interfaces, powered by WebSockets for low-latency communication.

Technologies: React, Express.js, Node.js, MongoDB, Cloudinary, Socket.io, Daisy UI, Tailwind CSS
