

WALEED AHMAD

Full Stack Web Developer

 [linkedin.com/in/xwaleedahmad](https://www.linkedin.com/in/xwaleedahmad)  waleedgondal57@gmail.com  github.com/xwaleedahmad  xwaleedahmad.com

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Lua
- **Technologies & Frameworks :** React, Next.js, Node.js, Express.js, Tailwind CSS, Motion, Zustand, Prisma, HTML5, CSS3, PostgreSQL, MongoDB, Mongoose, Supabase, Docker, Redis, AWS S3, Linux, Git, Github

EXPERIENCE

EastLancers — Full Stack Developer

Full-time | Remote | Jan 2024 - March 2026

Tech Stack: React, Next.js, Tailwind CSS, Node.js, MongoDB, Express.js, Prisma, Zustand

Full-Stack Developer (May 2024 - March 2026)

- Delivered full-stack web applications for clients across multiple industries, building marketplaces, dashboards, and business platforms using Next.js, React, Node.js, Express.js, MongoDB, and Prisma.
- Developed scalable backend services, REST APIs, authentication systems, advanced filtering engines.

Frontend Developer (Jan 2024 - May 2026)

- Built clean, responsive UI components with React, Motion and Tailwind CSS, focusing on reusability and performance and enhanced user experience by adding smooth transitions, animations, and interactive states.

PROJECTS

Batchmark

Building a privacy-first, browser-based image processing platform that enables creators to efficiently watermark, convert, and organize images without uploading files to a server.

Developing a high-performance batch processing and editing engine with reusable watermark templates (text, image, QR code, and patterns), allowing a single customized watermark to be applied consistently across hundreds of images in one operation.

Technologies: Next.js, Typescript, Tailwind CSS, Motion, PostgreSQL, Redis, Prisma

TmpBox

Built a lightweight, browser-based file sharing platform that enables instant file transfers without requiring user accounts, featuring custom expiry dates and secure cloud storage.

Technologies: Next.js, MongoDB, Typescript, Shadcn UI, Tailwind CSS, AWS S3

Supabase MCP

Developed an MCP server that allows AI assistants to securely interact with Supabase databases, supporting CRUD operations, schema inspection, and database management through natural language.

Technologies: Next.js, Typescript, Radix UI, Tailwind CSS, Supabase, Model Context Protocol, Mcp Adapter

Whisprly

Built a real-time messaging platform featuring instant messaging, media sharing, friend management, and responsive chat interfaces, powered by WebSockets for low-latency communication.

Technologies: React, Express.js, Node.js, MongoDB, Cloudinary, Socket.io, Daisy UI, Tailwind CSS

EDUCATION

Superior University 2023 - 2027 Bachelor of Science in Computer Science
